No. 13—Gross and Net Reproduction Rates and Birth Rates per 1,000 Women

Item	Western Australia		Australia	
	1947	1954	1947	1954
Gross Reproduction Rate (*a*)	1·683	1·772	1·493	1·558
Net Reproduction Rate (*b*)	1·595	1·704	1·416	1·497
Birth rate per 1,000 women (age 15 and over)	72·45	74·40	63·98	63·47
Birth rate per 1,000 women (ages 15 to 44 inclusive)	115·99	121·35	106·47	107·52
Ex-nuptial birth rate per 1,000 women (age 15 and over)	2·67	3·33	2·55	2·52
Ex-nuptial birth rate per 1,000 women (ages 15 to 44 inclusive)	4·28	5·42	4·24	4·27

(*a*) The gross reproduction rate is the estimated average number of female children born to every woman who lives through child-bearing age.

(*b*) The net reproduction rate allows for the effects of mortality and is an index of the number of women who in the next generation will replace the women of reproductive age in this generation.

No. 17—Causes of Death, 1959

Statistics of causes of death in Australia from 1958 are based on the Detailed List of the 1955 Revision of the International List of Diseases and Causes of Death. Certain categories have been grouped to facilitate publication, but in all cases the detail required for the Intermediate List of 150 Causes has been preserved, in accordance with World Health Organization Regulations. In general three-digit categories are used, but some four-digit sub-categories have been included to meet Australian requirements.

No. 3—Consolidated Revenue Fund Classified According to Function

This table is designed to show in respect to Consolidated Revenue only, the gross and net cost of each function of Government irrespective of the Department or Departments administering such functions. In cases where an activity could be classified to more than one function it has been shown under the heading which is deemed to be the major function, e.g., the education of natives is shown under "Education" and hospitals for natives have been shown under "Public Health," only the balance of "Care of Aborigines" being shown under "Welfare."

Certain functions are performed by Semi-Government Authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, e.g., Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits, e.g., Trading Concerns, Fremantle Harbour Trust. Public Debt Charges are shown as a separate function.

ANALYSIS OF ASSESSMENTS UNDER THE COMMONWEALTH INCOME TAX AND SOCIAL SERVICES CONTRIBUTION ASSESSMENT ACTS

Note.—Tables Nos. 15 to 21 inclusive have been compiled from information supplied by the Commissioner of Taxation. The information relates to assessments issued during a period of fifteen months, in the case of individuals, and eighteen months in the case of companies, after the close of the year of income.

The term " Central Office " appearing in some of the tables refers to the Central Office of the Taxation Department. Taxpayers who derive income (other than salary and wages and dividends) from more than one State and those whose income is derived wholly from sources outside Australia lodge their returns at Central Office.

(†) In June, 1957, the classification used in previous surveys was revised and changes in definition and regrouping of some classes necessitated a complete review of the classification of all advances. The main changes made were, (i) the provision of separate classes for advances to non-residents and non-profit organizations, and (ii) changes in the definition of and grouping of several industrial classes. The main changes under (ii) were :—

Manufacturing.—Now includes motor repairs previously included in the class, Transport, Storage and Communication.

Finance.—Previously Finance and Property. The sub-class Building and Contracting has been transferred to a new class 6, Building and Construction. The sub-class Building Investment Companies and Housing Societies, has been restricted to Building and Housing Societies and the sub-class Other (Banking and Insurance, etc.), has been restricted to financial institutions only. Business services (*e.g.*, Stock Brokers, Estate Agencies, etc.) previously included in this sub-class have been transferred to the class 7, Other Businesses. Holding companies also previously included are now classified to the main industry of their subsidiary companies.

Commerce.—The sub-class, Retail Trade, now includes motor garages and service stations previously included in the class, Transport, Storage and Communication.

These revisions should be noted when comparing the figures for 1957 with those for earlier periods.

(*a*) Including Local Government and Semi-Governmental Bodies but not Commonwealth or State Governments.

FIRE, MARINE AND GENERAL INSURANCE

Notes.—Tables No. 12 to No. 15 inclusive have been compiled from returns submitted by insurers transacting business in Western Australia.

The returns do not relate to a uniform period, the actual period varying according to the financial year of individual insurers.

The statistics shown conform substantially to the following definitions and should be interpreted accordingly.

(i) Premiums represent the full amount receivable in respect of policies issued or renewed during the year, less returns, rebates and bonuses paid or credited to policy holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When figures are increasing, as in recent years, premiums receivable (as shown in the tables) are greater than "earned premium income" appropriate to the year. The converse applies when figures are declining.

(ii) Claims include provision for outstanding claims and represent claims or losses incurred during the year. Salvage and other amounts recoverable have been deducted.

(iii) Contribution to Fire Brigades, Commission, Agents' Charges and Expenses of Management represent mainly charges paid during the year.

(iv) Taxation represents mainly payments made during the year and includes Income Tax, Pay-roll Tax, Licence Fees, Stamp Duty (where paid by the company), etc. Income Tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and the information shown is not suitable for the construction of a "Profit and Loss" statement or "Revenue" account.

I—TRADE AND CUSTOMS
EXTERNAL TRADE OF WESTERN AUSTRALIA

Report for the Year ended 30th June, 1960

In this Report all values are expressed in Australian Currency and the figures in parenthesis relate to the previous year.

1—SUMMARY OF IMPORTS AND EXPORTS

Although exports increased by £32·5 million to a total of £159·0 million the value of imports exceeded exports by £10·5 million, principally on account of increased purchases from other Australian States. However, there was an improvement of £9·2 million on the adverse balance for 1958–59 when the value of imports exceeded export earnings by £19·7 million.

Details of Imports and Exports for the last two years are as follows :—

	1958–59	1959–60
	£	£
Oversea Trade—		
Imports	44,985,964	46,181,555
Exports	91,800,931	120,068,508
Excess of Exports	46,814,967	73,886,953
Interstate Trade—		
Imports	101,214,984	123,347,757
Exports	34,691,997	38,929,952
Excess of Imports	66,522,987	84,417,805
Total Trade—		
Imports	146,200,948	169,529,312
Exports	126,492,928	158,998,460
Excess of Imports	19,708,020	10,530,852

2—PRINCIPAL IMPORTS—Oversea and Interstate

Principal imports from oversea countries were—Crude Petroleum £17,054,929 (£16,328,036) ; Machines and Machinery (except Dynamo Electrical) £5,915,924 (£4,684,242) ; Textiles £2,673,817 (£2,426,755) ; and Motor Vehicles (excluding Motor Cycles and Parts) £2,365,571 (£2,200,280).

The chief sources of goods were—United Kingdom £12,129,596 (£13,602,895) ; Arabian States £9,593,574 (£3,224,351) ; Iran £7,643,308 (£13,403,266) ; United States of America £2,362,324 (£2,100,320) ; India £1,554,315 (£1,414,635) ; Federal Republic of Germany £1,420,018 (£1,078,484) ; and Christmas Island (Indian Ocean) £969,646 (£1,116,723).

Imports from Australian States came mainly from Victoria £54,067,002 (£45,512,355) ; New South Wales £49,937,714 (£39,165,578) ; and South Australia £13,677,939 (£10,720,247). Of the total interstate imports Victoria supplied 43·8%, New South Wales 40·5%, and South Australia 11·1%. Some of the main commodities bought from New South Wales and Victoria were as follows :

Commodity Group	New South Wales	Victoria
	£	£

Into the State during the year ended 30th June, 1960

The following details are a combination of Interstate and Oversea Trade Statistics compiled from documents supplied by importers and their agents.

Note.

1. Oversea import values are stated in Australian currency, f.o.b., port of shipment.
2. Interstate import values are recorded in terms of "landed cost."
3. The abbreviation "N.E.I." used throughout the table denotes "Not Elsewhere Included."
4. The detail has been compiled according to a statistical classification of 21 Classes which are listed, together with an alphabetical index of imports and exports, on the preceding pages.
5. Christmas Island referred to in this table is in the Indian Ocean.

From the State during the Year ended 30th June, 1960

The following details are a combination of Interstate and Oversea Trade Statistics compiled from documents supplied by exporters and their agents.

Note.

(1) The value of goods is recorded in Australian currency on the basis of f.o.b., or its equivalent, at the port of shipment.

(2) The abbreviation "N.E.I." used throughout the table means "Not Elsewhere Included."

(3) The detail has been compiled according to a statistical classification of 21 classes—which are listed, together with an alphabetical list of imports and exports, on pages immediately prior to Table No. 5 (Imports).

(4) Christmas Island referred to in this table is in the Indian Ocean.

The Commonwealth Statistician,
West Block,
CANBERRA A C T

Dear Sir,

Bound Volume of the Statistical Register

The varying periods of time taken to compile and publish each of the separate Parts of the "Statistical Register of Western Australia" means that the bound volume of Parts cannot be issued until a considerable time after the period covered by the statistics contained therein, giving the "Bound Volume" a more or less historic value only. Because of this, and the high cost of binding, etc., it has been decided to discontinue the issue of the Bound Volume. The 1959-60 issue will therefore be the last.

The Parts, however, will continue to be published separately and these will provide information much more up-to-date than is possible from the Bound Volume.

This is an opportune time to consolidate my mailing list for the several Parts of the Statistical Register. I should be grateful, therefore, if you would examine the particulars, overleaf, of your present receipts of these publications and advise me, in the column provided, of your consolidated requirements for 1960-61 and subsequent issues.

A duplicate copy of this letter is provided for your records.

Yours faithfully,

Tony Barnett

Acting DEPUTY COMMONWEALTH STATISTICIAN

SIZE CLASSIFICATION OF RURAL HOLDINGS, SEASON 1955–56

Special tabulations relating to the classification of rural holdings, areas under crops and pasture, and livestock are published in Part V of the Statistical Register for 1955–56.

NOTES ON STATISTICAL DIVISIONS AND LOCAL GOVERNMENT AREAS

1. From 1929–30 Western Australian statistics of agriculture and livestock have been tabulated according to Local Government Areas. In this Part in the lists on pages 6 and 7 and in the tables where information for separate Local Government Areas is published, the district designations and names used are those which were current at the dates or during the periods to which the statistics relate. Exceptions occur in Tables 11 and 36 where account has been taken of the change, on the 10th June, 1955, of the name of Kent Road District to Nyabing-Pingrup and of the change, on the 28th March, 1958, of Upper Chapman to Chapman Valley.

Changes which have occurred since the periods to which the statistics in this issue relate and which have not been taken into account are :—

(i) the amalgamation, effective from the 1st July, 1960, of the Guildford Municipality and the Swan Road District to form the Swan-Guildford Road District ;

(ii) the abolition, effective from the 15th April, 1961, of the Wagin Municipality which became part of the Wagin Road District ;

(iii) changes under the provisions of the Local Government Act, 1960, which came into operation on the 1st July, 1961. Municipalities which already had city status remained "Cities," but other former Municipalities became known as "Towns," and Road Districts were renamed "Shires." Concurrently with the commencement of the Act, the names of a number of districts were altered. These changes are listed below.

Designation and Name

At 30th June, 1961	From 1st July, 1961
Municipality—	Town of—
Midland Junction	Midland
Road District—	Shire of—
Belmont Park	Belmont
Black Range	Sandstone
Collie Coalfields	Collie
Darling Range	Kalamunda
Drakesbrook	Waroona
Kununoppin-Trayning	Trayning-Kununoppin-Yelbeni
Marradong	Boddington
Phillips River	Ravensthorpe
Preston	Donnybrook
Wyndham	Wyndham-East Kimberley

2. Local Government Areas of the State are grouped into eleven Statistical Divisions and a table showing the Municipalities and Road Districts comprising these Divisions at the 1st January, 1960 is shown on page 6 and an Index of Local Government Areas at the same date is given on page 7. A map showing the boundaries of Statistical Divisions and Local Government Areas is published facing page 8.

3. For the purpose of statistics of agriculture and livestock, shown in this Part, each Municipality is combined with the surrounding Road District, except in the case of Bunbury Municipality, for which separate information is published.

BUSHEL WEIGHTS

The production of cereals, fruit and certain other commodities is generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation for individual products on account of such factors as variety and method of packing. The average bushel equivalent weights set out below may be used to convert production to pounds weight avoirdupois.

Product	Weight per bushel lb.	Product	Weight per bushel lb.	Product	Weight per bushel lb.
Apples	42	Loquats	45	Pears	45
Apricots	48	Maize	56	Peas, Field	60
Bananas	56	Mandarins	48	Plums	58
Barley	50	Nectarines	50	Quinces	42
Cherries	48	Oats	40	Rye	60
Figs	44	Oranges	48	Tomatoes	44
Grapefruit	42	Passion Fruit	34	Wheat	60
Lemons	48	Peaches	45

† Excludes South Ward, which is included in Metropolitan Division. (*a*) As at 30th June, 1960. (*b*) Excludes meadow hay. (*c*) This area exceeds "Total Area of District" because in cases where a holding extends across the boundaries of adjacent Local Government Districts the total area of the holding is attributed to the District in which the homestead is situated.

* Revised.

VIII—VALUE OF PRODUCTION

I. PRIMARY PRODUCTION

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realized at the principal market. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the principal markets.

(*b*) *Marketing Costs* comprise freight, cost of containers, commission, and other charges incurred in marketing.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting *Marketing Costs* from *Gross Value*.

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, and other selected costs of a similar nature.

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) and is obtained by deducting from *Local Value* the *Value of Goods Consumed in the Process of Production*. Such return is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income.

Gross and *Local Values* of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (*e.g.*, hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the *Net Value* of primary production by deducting the value of both primary and secondary products consumed by primary industries. Therefore, *Net Value* of primary production should be used when comparing or combining values for primary industries with those for secondary industries.

II. MANUFACTURING

(*a*) *Value of Output* is the selling value "at the factory" (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

(*b*) *The Value of Goods Consumed in the Process of Production* covers materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and packings.

(*c*) *Net Value of Production* is the value added in the course of manufacture. It is derived from the *Value of Output* by deducting the *Value of Goods Consumed in the Process of Production* and represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

In the process of manufacture, the output of one factory may become the raw material of another and aggregations of values of factory output therefore involve considerable duplication. However, in arriving at the *Net Value* of production of all factories, *i.e.*, value added by the process of manufacture, no duplication occurs as the value added by each factory is taken into account once only. Because of this, and as much of the output of primary industry becomes raw material of secondary industries, *Net Value* of factory production (as defined above) should be used when comparing or combining values for secondary industries with those for primary industries.

No. 56—Monthly Average Prices of Fruit—Metropolitan Markets, 1960

Note.—The average prices shown in this table have been computed from a systematic sample of auctioneers' records of fruit sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognized season does not reach a significant proportion of sales for the year, a price has not been shown. However, in computing the annual averages all sales have been included.

No. 57—Monthly Average Prices of Vegetables—Metropolitan Markets, 1960

Note.—The average prices shown in this table have been computed from a systematic sample of auctioneers' records of vegetables sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognized season does not reach a significant proportion of sales for the year, a price has not been shown. However, in computing the annual averages all sales have been included.

Part VI.—FACTORY STATISTICS

EXPLANATORY NOTES AND DEFINITIONS

Definition of Factory.—For statistical purposes a factory is defined as any establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year or power other than manual is used.

Classification.—In the case of a factory which engages in more than one industry on the same site a separate return is obtained, where possible, for each industry. Each of these components is then classified as if it were a separate factory. However, where it is not practicable for the manufacturer to submit separate returns, the factory is classified to the predominant activity, *e.g.*, a factory *principally* engaged in manufacturing Ice but also producing Aerated Waters and Cordials would be classified to Ice and Refrigeration if separate returns were not available.

Confidential Information.—The Acts under which these statistics are collected require that information supplied on any individual return must be treated as confidential. For this reason it has not been possible to publish some items and in other cases it has been necessary to combine details for publication. The tables affected carry appropriate footnotes.

Employment.—Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (*e.g.*, persons employed by sawmills in felling and hauling logs) and persons engaged in selling or distribution. Working proprietors are included unless otherwise stated.

Average employment figures may be expressed as an average " over the period worked " or as an average " over the whole year." Thus a factory which operates for only six months of the year and employs 20 persons throughout that period has an average employment of 20 " over the period worked," but an average of only 10 " over the whole year." The type of average is indicated in each table.

Value of Output.—The value of output is the selling value " at the factory " (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

Net Production.—" Net Production " is the value added in the course of manufacture. It is derived from the value of output by deducting the value of goods consumed in the process of production. The values deducted are those of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and packings. " Net Production " represents the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit.

Statistical Divisions.—A map showing Statistical Divisions and their component Local Government Areas appears in Part V of the Statistical Register of Western Australia.

(*a*) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

(*a*) Comprises gold refined at the mint and gold contained in gold-bearing materials exported. Figures for individual years do not agree with mine production, quoted in Tables 1, 3, 4 and 5, because of the delay between production at the mine and refining at the mint. Value is in Australian Currency, including amount realized by the Gold Producers' Association Ltd. from sales of Western Australian gold (£539,358 in 1952, £535,330 in 1953, £63,839 in 1954, £19,230 in 1955, £12,154 in 1956, £27,549 in 1957, £5,146 in 1958, £1,167 in 1959, £433 in 1960) and Commonwealth Net Subsidy paid to producers (£199,129 in 1955, £496,819 in 1956, £512,708 in 1957, £623,394 in 1958, £652,266 in 1959, and £698,242 in 1960). (*b*) Comprises gold in exported ores and concentrates.

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT AND MISCELLANEOUS

RETAIL PRICES

Prices of a limited range of commodities are recorded in the Blue Books of Western Australia from the early years of settlement. It was not until 1911, however, that a systematic collection of retail prices statistics, undertaken by the Commonwealth Statistician, was begun. The results of this inquiry were published in 1912 and thus, for the first time, particulars of retail prices in a selection of Western Australian towns became available. As well as providing data for each of five principal towns for the year 1911, the published information contained particulars for the capital city for each year from 1901 to 1910, the scope of the investigation having been specially extended for this purpose. The 46 commodities included in the collection, in addition to house rent, comprised a representative range of groceries, dairy produce and meat. The field of collection was later expanded to cover other groups of household expenditure.

Prices are now collected regularly for items of food ; clothing and drapery ; housing ; household supplies and equipment ; and miscellaneous commodities and services.

Representative and reputable retailers and service establishments are selected for each class of commodity and each service. These informants furnish regular returns of prices. Whenever necessary, particulars of prices are also obtained from other firms. For food items, prices are collected monthly, as at the 15th of each month, and are averaged for the three months of the quarter. For most other items prices are obtained quarterly as at the 15th of the middle month of the quarter. In general, prices are collected from actual vendors at retail selling outlets. The prices are those actually being charged for normal cash purchases of new articles. " Bargain " or " sale " prices of imperfect goods or discontinued lines are not used.

The information is collected, under authority of the Census and Statistics Act 1905–1949, for specified " standards " of the commodities and services priced. Specifications include the unit of quantity to be priced, the grade, quality, size, style, etc., and in some cases the particular brand and the manufacturer's " line " number. The standards selected are those with a considerable volume of sales and likely to remain representative over a long period.

The items and standards priced are revised from time to time to keep them in harmony with changing conditions. Before each quarterly collection the standards of all items are reviewed after extensive inquiries among manufacturers, wholesalers and retailers. Where changes in the items or standards priced become necessary, suitable adjustments are made in compiling price series to ensure that they reflect only changes in prices for representative goods of constant quality and not differences in prices of differing standards.

The actual collection of information is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who not only receive and check returns but visit the shops or other establishments concerned.

Table No. 8 on page 15 shows the average retail prices in the metropolitan area of 40 items of food and groceries during each month of 1960.

RETAIL PRICE INDEX NUMBERS

The collected information relating to prices of goods and services may be summarized in the form of index numbers. Prices of items, selected as being representative of a high proportion of the expenditure of wage-earner households, are combined at regular intervals by the use of " weights " in approximate proportion to quantities actually used. The aim is to express as a single number the degree of change in prices for the selected field taken as a whole. In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

Basically in the simplest method of compiling retail price indexes the price of each item is multiplied by a fixed quantity or " weight," the product being an " expenditure." The sum of these products for all items at any given date represents an " aggregate expenditure." The " aggregate expenditures " for successive periods are converted into an index series by equating the aggregate for a selected or " base " period to 1,000 (or some other convenient number), and calculating all index numbers to this base according to the ratio which the several aggregates bear to that of the base period.

The " A " Series Index was first compiled in 1912 and although it was both rudimentary and of limited scope, covering only food, groceries and house rents, it was not discontinued until 1938. The " C " Series Index was first compiled in 1921, and retrospectively to 1914, to supply the need for a more adequate index. It was originally described as the " All Items " Index, to distinguish it from the " A " Series, because it included, in addition to food, groceries and house rents, many items of clothing, household drapery and utensils, fuel, lighting, fares, smoking and some other miscellaneous items.

RETAIL PRICES—*continued*

The list of component items and the weighting pattern of the " C " Series Retail Price Index, first adopted in 1921, were revised by Conference of Statisticians in 1936, but from that time remained almost unchanged. From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls, including rationing, caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes in the index desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Commonwealth Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the " C " Series Retail Price Index, in the light of the new pattern of wage-earner expenditure and consumption that appeared to be then emerging. However, there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing " C " Series Index on the 1936 revision. A Conference of Statisticians considered the matter in June, 1953, and resolved, in part, as follows :—

" (a) That, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period, it is undesirable to make a general revision of the list of items and weighting system of the " C " Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes.

(b) That an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure."

The " C " Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index, with the year 1952–53 as its base, was introduced in 1954 and continued until the March quarter of 1960. This Interim Index was a transitional index designed to measure retail price variations on the " C " Series model in terms of post-war consumption weights, as emerging in the early 1950's. It embraced a wider range of commodities and services than did the " C " Series Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index, concurrently with their happening in those years. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

During this period home-owning largely replaced the renting of privately-owned houses, the numbers of government-owned rented houses increased appreciably, the use of the motor car greatly increased and partly replaced use of public transport, various items of electrical household equipment and television came into widespread use, household consumption of electricity greatly increased, and technological developments such as the introduction of new synthetic materials produced a number of changes in clothing and other groups of items. Through the impact of these continuing changes in usage, combined with disparate movements in prices, the Interim Retail Price Index became outmoded. As studies progressed and new data became available, it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals during the period 1950–1960.

THE CONSUMER PRICE INDEX

For current statistical purposes the Consumer Price Index has replaced both the " C " Series Retail Price Index and the Interim Retail Price Index in official statistical publications. The title " Consumer Price Index " is used for purposes of convenience and does not imply that the new index differs in definition or purpose from previous retail price indexes. The purpose of the Index is to measure quarterly variations in retail prices of goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditures of an " average " or individual household of specified size, type, or mode of living. It is thus possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Investigations revealed that the incidence and frequency of changes in the pattern of household expenditure since 1950 were such as to render it necessary to construct not one but a series of new indexes introducing additional items and changes in weighting patterns at short intervals during the following ten years. The Consumer Price Index therefore consists of a sequence of four short-term retail price indexes linked to form a continuous series, with reference base year 1952–53 = 100·0. It is envisaged that future links will be made in the index when significant changes in the pattern of household expenditure render it necessary to do so.

RETAIL PRICES—*continued*

The Consumer Price Index covers a wide range of commodities and services arranged in the five major groups, Food ; Clothing and Drapery ; Housing ; Household Supplies and Equipment ; and Miscellaneous. It is designed only to measure the proportionate change in prices as combined in the individual groups, or the aggregate of the groups in the index. This is a basic principle of all price indexes, and failure to appreciate it gives rise to misconceptions concerning price indexes and their uses. Consumer (retail) price indexes are sometimes loosely called " cost of living indexes " and are thought to measure changes in the " cost of living."

Neither the Consumer Price Index, nor any other retail price index, measures those changes in the cost of living that result directly from changes in the standard of living. Changes of that kind are matters for consideration apart from price indexes. But the change in prices of goods and services is a very important part of the change in any cost of living and this part is measured by consumer (retail) price indexes.

The following summary gives a general description of the nature of the items included in the several groups which together comprise the Consumer Price Index.

Food—Meat (fresh and processed) ; dairy produce ; cereal products ; soft drink, ice cream and confectionery ; potatoes, onions and preserved fruit and vegetables ; and other foods including sugar, jam, margarine, tea, coffee, baby foods, and sundry canned and other foods.

Clothing and Drapery—Men's, women's, boys' and girls' clothing ; men's, women's and children's footwear ; household drapery ; and piecegoods and knitting wool.

Housing—Costs (house price, rates, repairs and maintenance) involved in home ownership or purchase by instalments ; and rent paid to a private owner or government authority.

Household Supplies and Equipment—Household appliances ; fuel and light ; and household articles including floor coverings, kitchen and other utensils, gardening and small tools, household sundries, personal requisites, proprietary medicines and school requisites.

Miscellaneous—Transport (train, tram and bus fares and private motoring costs) ; beer ; tobacco and cigarettes ; services such as hairdressing, dry cleaning, shoe repairs and postal and telephone services ; and other expenditure including costs of radio and television operation, cinema admission and newspapers.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

The sets of weights used have been derived from analyses of statistics of production and consumption, the Population Censuses of 1947 and 1954, the Censuses of Retail Establishments of 1948–49, 1952–53 and 1956–57 and the continuing Survey of Retail Establishments ; from information supplied by manufacturing, commercial, and other relevant sources ; and from special surveys.

The index has been compiled for each quarter from the September quarter of 1948, and for each financial year from 1948–49. " All Groups " index numbers, and group index numbers for each of the five major groups, are compiled and published regularly for the six State capital cities separately and combined. The reference base for *each* of these indexes is : Year 1952–53 = 100·0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted merely to avoid the minor distortions that would occur in rounding off the figures to the nearest whole number.

The separate city indexes measure price *movements* within each city individually. They enable comparisons to be drawn between cities as to differences in the degree of *price movement*, but not as to differences in the *actual price level* since the index for each city is independently based, on the prices recorded *in that city* during 1952–53. Similarly, the separate group indexes measure price movements of each group individually. They enable comparisons to be drawn as to differences in the degree of price change in the different groups, but do not show the comparative cost of the different groups.

The index for the six capital cities combined is a weighted average of price movement in the individual cities. The relative influence of the several cities on the combined index is determined by their populations at the 1954 Census.

II.—WAGES

THE BASIC WAGE

The concept of a " basic " or " living " wage occurs commonly in the determinations of wage fixing authorities in Australia, although it may vary in definition. Originally the term was understood to mean the minimum or " basic " wage necessary to provide a reasonable standard of comfort for the average worker and his family. In later years, however, economic factors have been taken into account and, in determining specified minimum rates of wage, consideration has been given to the capacity of industry to pay those rates.

There are two tribunals, the Commonwealth Conciliation and Arbitration Commission and the State Court of Arbitration, which have authority to declare basic wage rates applicable in Western Australia.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The Act contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage, including " loadings," payable to an adult unskilled labourer. A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill."

The State Industrial Arbitration Act defines the basic wage as " a wage which the Court considers to be just and reasonable for the average worker to whom it applies." The Court must have regard for the needs of the worker to enable him to live in reasonable comfort. An amendment of 1950 requires that the Court shall take into consideration the economic capacity of industry but, in so doing, shall not reduce the basic wage below an amount which it deems necessary to maintain this reasonable standard of comfort.

The Commonwealth Conciliation and Arbitration Commission was established in 1956 by an amendment to the Conciliation and Arbitration Act which had the effect of allocating to the Commission the arbitral functions and to a Commonwealth Industrial Court the judicial functions formerly carried out by the Commonwealth Court of Conciliation and Arbitration. As prescribed in the Act, the Commission consists of a President, not less than two Deputy Presidents, a Senior Commissioner and not less than five Commissioners. At the 31st December, 1960 there were, in addition to the President and the Senior Commissioner, five Deputy Presidents and seven Commissioners. The Act also provides for the appointment of Conciliators. The Commonwealth Industrial Court, as originally constituted, comprised a Chief Judge and two other Judges. An amending Act of 1960 authorized the appointment of an additional Judge. Membership of the Bench was increased in June, 1960 to four Judges including the Chief Judge.

The State Court of Arbitration consists of a President, who must be a person qualified to be appointed a Judge of the Supreme Court, a representative of the employers' organizations registered with the Court, and a representative of the employees' unions.

Commonwealth Basic Wage

The first determination of a wage standard by a Court in Australia was made in 1907, when Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, fixed an amount of £2 2s. per week for Melbourne as reasonable to meet the needs of " a family of about five." This determination is commonly referred to as the " Harvester Judgment " from the fact that it related to an application by the proprietors of the Sunshine Harvester Works that the wage paid to their employees was " fair and reasonable."

The " Harvester " standard was adopted by the Court for incorporation in its awards and the rates remained virtually unchanged until 1913. In that year the Court began to have regard to retail price index numbers the first of which, the " A " series, covering food and groceries and rent of all houses, had recently been published by the Commonwealth Statistician. In general, the practice was to revise basic wage rates in direct proportion to variations in the retail price index. Until 1918 the Court, in computing " Harvester " equivalents, used the index numbers for the previous calendar year and, from 1918 to 1921, the figures for the next preceding four quarters.

During the period of application of this system, it was frequently contended that it failed to maintain the " Harvester " standard. Criticism became more general with the rise in prices towards the end of the first World War and led to the appointment in 1919 of a Royal Commission on the Basic Wage under the chairmanship of A. B. Piddington, K.C. The " Piddington Commission," as it came to be called, was required by its terms of reference to enquire into the actual cost of maintaining in a reasonable state of comfort a household comprising a man and his wife and three children under fourteen years of age, and also the means to be adopted for the automatic adjustment of the basic wage in order to maintain its purchasing power. The Commission presented its findings in two reports, the first of which was made in November, 1920, and the second in April, 1921. The recommendations in relation to a living wage were rejected by the Court as being so much in excess of existing wages as to cause doubt about the capacity of industry to pay such rates. The Commission's finding in regard to the automatic adjustment of the basic wage led to the creation of the " C " Series Index of Retail Prices, an index much more comprehensive in scope than the original " A " Series, in that it includes the additional groups Clothing and Miscellaneous Expenditure.

Commonwealth Basic Wage—*continued*

In 1921, the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the " A " Series index, and a loading of 3s. was added to the " Harvester " equivalent by Mr. Justice Powers to ensure that during a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until the depression of the 1930's, when the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by ten per cent. as from the 1st February, 1931.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the " A " Series index numbers had resulted in a decrease of real wages to a level below the prescribed percentage. To correct this decline, it adopted the use of the " D " Series index, derived by combining the " A " and the " C " Series indexes.

In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The " Harvester " standard supplemented by the Powers loading of 3s. was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of £4 4s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The " C " Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus the 1933 equivalent in purchasing power of an amount of £4 4s. in 1926 was £3 7s., to the nearest shilling (84s. $\times$ 829 $\div$ 1,033), which became the rate applicable in Sydney from the 1st May, 1934. The equating of this wage to the index number 829 established the relationship ' 1,000 in the " C " Series index = £4 1s. in the wage ' (67s. $\times$ 1,000 $\div$ 829, to the nearest shilling) and by applying the multiplier 0·081 to the " C " Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the beginning of the first pay period in the months of June, September, December or March, and adjustments were continued on this basis until 1939. Thereafter they took effect from the beginning of the first pay period commencing in the months of February, May, August or November, until their abolition by the Court in its judgment of the 12th September, 1953.

The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the " C " Series to a special " Court " Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, simply a table expressing in shillings the wage rates derived by the use of the conversion factor 0·081. The Court's judgment further provided for the addition of " prosperity loadings " to the rates so derived, which came to be designated the " needs portion " of the wage. The amount of the loading applied to the " needs " wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

In general, the method of the 1937 judgment was retained by the Court until its " interim " decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the " needs " portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this new series, the " C " Series index number (1146) for the Six Capital Cities as a whole in the September quarter, 1946 was equated to the " needs " portion (£5) of the new Six Capitals wage. This established the base, 1000 in the " C " Series index = £4 7s. in the wage. The immediate monetary effect was to increase by 7s. per week the " needs " wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of £1 per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series), derived by equating 1572 (the " C " Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to £8 2s., the increased weighted average wage for the Six Capitals (made up of the " needs " portion £6 17s., plus a uniform prosperity loading of 5s., plus the additional £1 awarded by the Court). In this way, 1000 in the " C " Series index became equal to £5 3s. in the wage. In determining the new rate of payment, a uniform amount of £1 5s. was added to the existing " needs " basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by £1 1s., and for the Six Capital Cities as a whole by £1. From, and including, the first pay period in February, 1951, the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components " needs portion " and " prosperity loading " ceased to exist as separate and distinguishable parts of the wage.

Commonwealth Basic Wage—*continued*

Following applications by employers' organizations requesting, among other things, "that the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned" and counter claims by employees' organizations for increases in the basic wage for adult males, the Court on the 16th September, 1952 commenced hearing evidence in what has come to be known as the "Basic Wage and Standard Hours Inquiry, 1952–53." Submission of evidence continued intermittently until the 11th September, 1953, and on the following day the Court announced its decision. The application for discontinuance of the system of adjusting the basic wages in accordance with variations in the retail price index numbers was granted but all of the other applications were refused. On the 27th October, in stating the reasons for its decisions, the Court made it clear that, as in its opinion there should be no departure from "its now well established principle that the basic wage should be the highest that the capacity of the community as a whole can sustain" and as it had "withdrawn from relating the basic wage to the fulfilment of any particular standard of needs," the Court "finds it impossible to justify the continuance of an 'automatic' adjustment system whose purpose is to maintain the purchasing power of a particular wage (assessed with regard to the capacity of industry to pay such wage in 1950)." In consequence, the wage rates which had applied from the beginning of the first pay period commencing in August, 1953, continued to operate.

In November, 1955, application was made to the Court by certain employees' organizations seeking an alteration of the basic wage. Among matters included in the application were requests that the wage be increased to the amount which it would have reached if automatic quarterly adjustments, discontinued since September, 1953, had continued to apply, that the wage be raised by a further £1, and that automatic quarterly adjustments be restored. In the course of the hearing the Attorney-General, in exercise of powers conferred by the Conciliation and Arbitration Act, intervened in the public interest on behalf of the Commonwealth and each of the State Governments was represented by counsel or by a State official. In its judgment, delivered on the 25th May, 1956, the Court refused the first of the union's claims and rejected the request for the restoration of the quarterly adjustments, but granted an increase of 10s. per week in the adult male basic wage to apply from the beginning of the first pay period commencing in June, 1956.

The next basic wage hearing commenced before the newly-constituted Commonwealth Conciliation and Arbitration Commission on the 13th November, 1956. The unions' claims were substantially the same as in the previous case except that the clause relating to an increase of £1 in the basic wage was not included. Again the Commonwealth Government intervened in the public interest and representatives of the South Australian and Victorian State Governments appeared before the Commission. In its judgment on the 29th April, 1957, the Commission rejected the claims made by the unions and granted a uniform increase of 10s. per week in the adult male basic wage to apply from the beginning of the first pay-period commencing on or after the 15th May, 1957.

On the 18th February, 1958, the Commission began hearing an application by unions claiming that the basic wage be increased to the amount which it would have reached had the system of quarterly adjustments been retained plus an addition of 10s. per week, and that the resultant wage be subsequently varied by quarterly adjustments. The claims were opposed by the State of South Australia but Tasmania, the only other State represented, appeared in support of the unions' application. The Attorney-General of the Commonwealth intervened in the public interest. In delivering judgment on the 12th May, 1958, the Commission refused the claim for restoration of automatic quarterly adjustments but granted an increase of 5s. per week in the adult male basic wage, to come into effect from the beginning of the first pay-period commencing on or after the 21st May, 1958.

At the 1959 inquiry, which opened on the 24th February, the unions' claims were the same as those submitted in the previous year. The States of South Australia and Tasmania were again represented, South Australia opposing all the claims and Tasmania supporting those for an increase in the basic wage to the amount which it would have reached had the system of quarterly adjustments been retained and for restoration of the system. The Commonwealth Attorney-General intervened. On the 5th June, 1959 the Commission delivered judgment and granted an increase of 15s. per week in the basic wage for adult males, the new rate to operate from the beginning of the first pay-period commencing on or after the 11th June, 1959. All other claims were rejected. An application which had been made on behalf of employers in the pastoral industry seeking a reduction of £1 5s. in the basic wage payable to pastoral workers was also refused.

On the 16th February, 1960 the Commission began hearing an application by the unions for the restoration of quarterly adjustments to the basic wage and for an increase in the amount of the wage. On the six capital cities rate the increase sought was £1 2s. per week, representing an addition of 5s. to restore the real value of the wage to its 1953 level, and a further amount of 17s. being the unions' minimum estimate of the increase in productivity which had occurred since the automatic adjustment system was discontinued. The Commonwealth Government intervened and all States except New South Wales were represented. The State of South Australia opposed the unions' application. Victoria, Queensland and Western Australia, while presenting information to show how their finances would be affected by wage increases, neither supported nor opposed the claims. Tasmania supported the application for restoration of quarterly adjustments. In its judgment, delivered on the 12th April, 1960, the Commission refused the unions' application.

WAGES—*continued*

State Basic Wage

Under the provisions of an amendment of 1925 to the Industrial Arbitration Act, 1912, the State Court of Arbitration was required to declare a basic wage annually, to operate from the 1st July in each year.

In 1930, the Court was empowered by another amendment to the Act to adjust the annual declaration each quarter in consonance with " the variation (if any) in the cost of living." A further amendment in 1950 removed this obligation and gives the Court discretion to make basic wage determinations at any time, provided that such reviews are at intervals of not less than twelve months. The provision for quarterly adjustments was retained. Basic wage determinations of the Court are automatically applicable, and thus become the minimum wage permissible by law, in respect to all male and female workers who are covered by industrial awards made by the State Court or by agreements registered with the Court and those who come within the provisions of the Factories and Shops Act.

The first decision of the Court took effect on the first July, 1926, and prescribed a rate of £4 5s. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements and allowed such amounts for each as to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was the equivalent of the Piddington Commission's standard but reduced to provide for a family unit of four ; for Rent, the average rental of four- and five-roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous Expenditure, an amount based on the Piddington Commission's findings.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. and £2 7s. respectively, with the exception of certain specified goldfields areas for which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage for the Metropolitan Area of £4 6s. for males and £2 6s. 5d. for females. In this connexion, the Metropolitan Area is the area comprised within a radius of 15 miles from the General Post Office, Perth. Rates for all other parts of the State were fixed at £4 5s. and £2 5s. 11d. respectively.

Additional power was given to the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the rates fixed by the annual declaration and, on the 3rd March, 1931, rates of £3 18s. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, and of £3 17s. and £2 1s. 8d. for all other parts of the State. The Court is empowered to make such quarterly adjustments only when a rise of one shilling or more per week is indicated in the " cost of living."

The annual declaration operative from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a separate wage for agricultural areas, which are taken to be those areas, other than the Court's Metropolitan Area, contained within the official South-West Land Division as described in the Land Act.

In 1938 an inquiry, which was the most comprehensive since the original declaration, gave special consideration to the factors of national income and standards of nutrition and as a result wage levels throughout the State were considerably increased from the 1st July in that year. The Rent and Miscellaneous Expenditure elements of the wage were based on the existing standards but Clothing was based on the Piddington standard, reduced to provide for a family unit of four, and Food and Groceries on the Piddington standard plus an amount of 1s.

Subsequent annual declarations until 1942 maintained in purchasing power the standard of the 1938 judgment.

State Basic Wage—*continued*

At a sitting of the Court held on the 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, under the existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the standards of the relevant annual declaration. It was followed by a similar decision given on the 29th April, 1942, when the Court reaffirmed that no adjustment should be made to existing rates, despite further increases in retail prices.

On the 11th June, 1942, the Court, in its annual declaration, adopted as its new base the rates which had operated since the 28th July, 1941, and these remained in force until the 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier under the authority of National Security (Economic Organization) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations from 1938 to 1941.

On the 30th October, 1942, these standards were readopted by the Court for the purposes of the quarterly adjustments and continued to apply until the Interim Basic Wage Declaration of the 26th February, 1947. In this declaration, made under powers conferred by an amendment in December, 1946, to National Security (Economic Organization) Regulations, the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

An amendment of 1950 to the Industrial Arbitration Act removed the Court's obligation to make annual declarations, empowers it to make basic wage determinations at any time during the year at intervals of not less than twelve months, subject only to quarterly adjustments, and requires that in such determinations the Court must give due consideration to the economic capacity of industry to pay any proposed increase in the basic wage.

Consequent on the judgment of the Commonwealth Court on the 12th October, 1950, the State Court declared a new wage, incorporating an increase of £1 for males and 15s. for females and consolidating the four elements and the loading previously mentioned, to have effect from the 18th December, 1950. This meant that the concept of a composite wage, which had applied since the initial declaration in 1926, was now abandoned. It also decided in January, 1951, that any quarterly adjustments should be based on variations in the "C" Series Retail Prices Index Numbers. On the 28th November, 1951, the Court raised the basic wage for females from 54 per cent. of the male rate to 65 per cent., the new rates to operate from the 1st December, 1951.

On the 13th November, 1953, the Court again exercised its discretionary powers, conferred by Section 127 of the Act, and determined that no change should be made in the basic wage, although there had been an appreciable increase in the "C" Series Retail Prices Index. This decision governed subsequent determinations until the 9th August, 1955, when the Court reverted to the practice of making quarterly adjustments.

On the 30th January, 1960, the Court raised the basic wage for females from 65 per cent. to 75 per cent. of the male rate, the new rates to operate from the beginning of the next succeeding pay-period.

No. 32.—Building Operations—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by Governmental agencies and the activities of "Owner-Builders."

The term "Owner-Built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

DWELLINGS SUMMARY, WESTERN AUSTRALIA—CENSUSES OF 1947 AND 1954

In Tables Nos. 35, 36, 37, 40, 42, 43, and 44 figures are shown separately for "Metropolitan Urban," "Other Urban," and "Rural."

"Metropolitan Urban" comprises the Metropolitan Statistical Division.

"Other Urban" comprises—

(1) all country municipalities; and

(2) towns outside the Metropolitan Statistical Division not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes, and which had a population of 1,000 or more at the Census.

"Rural" comprises all that part of the State not included in "Metropolitan" and "Other Urban."

For the purpose of the Census a "*dwelling*" is any habitation occupied by a household group living together as a domestic unit whether comprising the whole or only part of a building.

No. 35.—Number of Occupied Dwellings, according to Class

(*a*) In previous Censuses dwellings returned on the Schedules as Sheds, Huts, Garages, etc., were included with Private Houses. In the Census of 1954 these dwellings are shown in tabulations as a separate group whenever practicable, but are linked with Private Houses to preserve continuity with past Census results.

(*b*) "Share of Private House" is a portion of a shared Private House which is occupied separately and for which portion a separate Householder's Schedule was furnished.

(*c*) "Flat" is part of a House or other building which can be completely closed off and which includes both cooking and bathing facilities.

(*d*) "Other" Private Dwelling is part of a building which is not a self-contained unit. It may be an apartment, rooms, etc.

(*e*) "Dwellings Other than Private" include Hotels, Boarding Houses, Lodging Houses, Hostels, Hospitals Educational, Religious and Charitable Institutions, Defence and Penal Establishments, etc.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 45.—Estimated Annual Consumption of Foodstuffs and Beverages

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors are also given.

The figures have been derived from records of production, imports and exports, for the years 1955–56 to 1959–1960, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc.

Where the necessary data were available, adjustment has been made for movement in stocks and for exports as ships' stores.

RETAIL SALES STATISTICS

Introduction

Throughout the tables, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) made to the public by establishments selling retail goods from fixed premises such as shops, rooms, kiosks and yards. Data for the years 1948–49, 1952–53 and 1956–57 were obtained from Censuses taken in respect of those years and are more detailed than those for other periods (*see* Table No. 47), which are estimates derived from a quarterly sample survey.

The information contained in Table No. 47 is extracted from a quarterly statistical statement "Retail Sales of Goods," which contains similar information for each of the other States and for the Commonwealth as a whole. Tables Nos. 48 to 52 have been extracted from Bulletins No. 13 and 14 of the Censuses of Retail Establishments for the years ended 30th June, 1953 and 30th June, 1957, respectively.

Scope of Censuses and Intercensal Surveys

The collections have been designed principally to measure sales to the final consumer of goods (new and second-hand) which are normally for household and personal use. For this reason, sales of farm machinery and equipment, earth-moving equipment, etc., and basic building materials, although collected, have been excluded from published figures ; industrial machines and equipment collected in the 1956–57 Census have also been excluded. However, 1948–49 figures do include building materials (except timber). Motor vehicles, parts, etc., whether for industrial, commercial, farm or private use are included, as are business machines such as typewriters when sold from a retail establishment.

Wholesalers and manufacturers are included only if they sell *regularly* by retail, but itinerant vendors and casual stalls or booths are entirely excluded as are clubs, societies and similar organizations selling to their own members.

Because of these factors, the aggregates shown for some commodity groups may be less than the total shown by all establishments regardless of definition ; this applies particularly to tobacco and beer, wine and spirits which are also sold by establishments outside the scope of this collection. However, although the figures are not contained in this publication, some additional details of sales of these items were obtained from a supplementary collection of licensed clubs, etc., at the Censuses in 1953 and 1957.

In addition to ordinary retail shops, as generally understood, the collection covers :—

Hotels, wine saloons and refreshment rooms.
Bakers, whether selling from retail premises or from a vehicle.
Produce Merchants.
Tailors.
Garages and service stations, motor vehicle distributors.
Gas and Electricity suppliers in respect only of their retail sales of appliances.
Wood and Ice Merchants (excludes some selling only from a vehicle).

The following types of activities are excluded :—

Opticians and optometrists.
Clubs, guest houses, theatres and cinemas.
Agents (except in respect of goods sold on own behalf).
Dry Cleaners and Laundries.
Direct selling (either on site or from delivery vehicles) from market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, except where a shop or regular roadside stall is conducted.
Hawkers, street barrows, casual stalls and street sellers.
Timber yards and joinery works.
Brick works.
Roofing tile works.
Trade services such as monumental masonry, carpentry, electrical contracting, plumbing, upholstery, etc.
Real estate agents, stock and station agents.
Newspaper publishers and printers.
Photographers and picture framers.
Dressmakers.
Caterers for special occasions (races, sports meetings, etc.).
Chiropodists.
Herbalists.
Lending libraries.

Classification of Type of Business

The classification of each establishment is according to the predominant type of goods sold or service rendered. It is based mainly on the dissection of commodity sales recorded on the forms but, in some cases, namely, " Other Food " and " Other Goods," the description given by the proprietor is used as a guide. For the purpose of determining the predominant type of goods sold some combinations of commodity items are considered as " main lines," *e.g.*, Clothing and Drapery (Men's and Boys' wear ; Women's, Girls' and Infants' wear ; and Drapery, Piecegoods, Manchester, etc.). Accordingly, establishments are classified to type of business on the basis of the predominant " main line " of goods sold or service rendered and where the " main line " consists of a combination of items, the classification is made to the major item within the " main line."

In 1948–49 the description of business given by the proprietor formed the basis of the classification to type of business, although in cases where the description given did not indicate the nature of goods sold (*e.g.*, general store, variety store, etc.), type of business was determined by the commodity group in which the largest sales were recorded. Differences in coding procedure between the 1948–49 and subsequent Censuses would affect only those establishments with sales of approximately equal value in two or more commodity groups. Some such composite establishments may have been coded to one type of business in 1948–49, when classified in accordance with the description of business given, but to another type of business in 1952–53 and 1956–57, when classified in accordance with the " main line " with the largest sales.

Collection Forms

The forms used for the Censuses and Surveys differ mainly in respect to the detail required. Both forms make a clear distinction between :—

(1) Retail Sale of goods ; and
(2) " Other Takings."

The Census form, however, requires takings for each item under " Other Takings," *e.g.*, wholesale sales, hairdressing, repairs, meals, accommodation, laundry and dry cleaning, etc., whereas the Survey form requires separate takings for meals and accommodation and repairs only and requests informants to exclude all other takings.

The commodity groups published at each Census are listed in Table No. 48. It is impossible to define or list in detail the types of goods to be included under each commodity group so traders are asked to show figures for each group in accordance with ordinary trade groupings as understood by them. The commodity group totals are therefore subject to this qualification. In particular, despite numerous queries made when the returns are being examined, it is possible that traders do not always show separately sales of Tobacco, Cigars and Cigarettes in the item provided on the Census form.

Statistical Retail Areas

These areas have been designed for Retail Census purposes and are groups of contiguous Local Government Areas within Statistical Divisions. In Western Australia the Metropolitan Statistical Division has been divided into nine Statistical Retail Areas but each of the remaining Statistical Divisions has been regarded as a Statistical Retail Area, with the exception of Central, North-West, Pilbara and Kimberley Statistical Divisions which, combined, form one Statistical Retail Area. Names of Local Government Areas included in each Statistical Retail Area and Statistical Division are shown in Table No. 52 and on the map of Western Australia in Part V of the Statistical Register. For purposes of the 1956–57 Retail Census the City of Perth was sub-divided into three areas, *i.e.*, The Inner City Area, Victoria Park Ward and the Remainder of the City and separate details are shown for these areas in Tables No. 51 and 52. For the above purpose the Inner City Area consists of the area bounded on the north by the railway, on the east by the centres of Lord Street and Victoria Avenue, on the south by the River and on the west by the centres of Spring Street, Mount Street, Milligan Street, Hay Street, George Street and its prolongation northerly to the railway ; Victoria Park Ward consists of the area bounded by the centres of Orrong Road, Kew Street, Welshpool Road, Albany Highway, Boundary Road, Taree Street, Reen Street, Hill View Terrace, Marquis Street, edge of Collier Pine Plantation, Fremantle Road, edge of Collier Pine Plantation and its prolongation to Jarrah Road, Tenth Avenue, Anketell Street, Rathay Street, Berwick Street (including both sides), Canning Highway, Ellam Street, River to Orrong Road.

In addition, separate figures for 1956–57 are shown for Kalgoorlie and Suburbs, which consists of the Municipalities of Kalgoorlie and Boulder and part of the Road District of Kalgoorlie. This area corresponds to that delineated for Population Census purposes.

(*a*) Figures for 1948–49 refer to establishments with total retail sales of £50 or more, whilst figures for 1952–53 and 1956–57 refer to establishments with total retail sales of £500 or more. In 1952–53 there were 294 establishments with retail sales of less than £500, but more than £100, with total retail sales of £85,000. (*b*) Total value of all commodities sold by retail by the types of business shown. (*c*) Cafes, restaurants, etc., selling goods. Excludes those selling meals only. (*d*) Includes establishments whose sole type of business is Basic Building Materials. (*e*) Includes sales by establishments whose sole type of business is Basic Building Materials. (*f*) This figure differs from its counterpart in Table 48 because it includes retail sales of motor vehicles, etc., by establishments whose *main* type of business is other than motor vehicles and excludes retail sales of goods other than motor vehicles, etc., by establishments whose *main* type of business is motor vehicles. (*g*) *See* note (*f*) above. * Revised.

(*a*) From 1915, year ended 30th June. (*b*) Excluding plywood and veneers and small quantities of timber for which no super footage is recorded. For the years 1906 to 1921, figures are approximate. (*c*) Figures for the years 1949–50 to 1951–52 represent oversea exports only and exclude small consignments to other Australian States. Those for 1952–53 and later years include small consignments of cooked whole crayfish to other Australian States. (*d*) A major oil refinery began production in 1954–55. In some earlier years there were small consignments of re-exported products which were of little significance and are not shown. (*e*) Six months ended 30th June. (*f*) Precise information not available, but it is known that the value of exports was about £250,000.

(*a*) From 1906, at 30th June ; for earlier years, at 31st December. (*b*) Includes certain leases and licences issued by Mines and Forests Departments. Apparent decrease in 1951 due mainly to revisions in records of Lands Department. (*c*) At 31st December for 1941 and earlier years ; from 1942, the figures shown relate to 31st March in the following year. (*d*) Includes fellmongered and dead wool but excludes wool exported on skins. For 1947 and earlier, year ended 31st December ; figures shown for 1948 and later are for the year ended 31st March in the following year. (*e*) Figures for 1949 and 1951 to 1955 exclude interim distributions of profits under the 1939–1945 War-time Wool Disposals Plan aggregating £6,934,967. Separate State figures are not available for distributions made in later years. (*f*) Not available.

(*a*) Comprises gold refined at the mint and gold contained in gold-bearing materials exported. (*b*) Australian currency value including amounts, totalling £1,204,206 for the years 1952 to 1960, distributed by the Gold Producers' Association Ltd. from premiums on sales of Western Australian gold. Also includes net subsidy payments by the Commonwealth Government, under the Gold-Mining Industry Assistance Act 1954–1959, totalling £3,182,558 in the years 1955 to 1960. (*c*) From 1915 figures relate to year ended 30th June. (*d*) Prior to 1940 averages generally are based on exports of the previous season's wheat; from 1940 they relate to exports during the year ended 30th June. (*e*) Not available. (*f*) Exports negligible; average Metropolitan Market price shown. (*g*) For six months ended 30th June. (*h*) Not available at time of publication.

(*a*) Figures generally are for the season or financial period ending in the following year. (*b*) Represents the estimated value of recorded production based on wholesale prices realized at the principal market. (*c*) In addition, the following amounts were paid as interim distribution of profits under the 1939–1945 War-time Wool Disposals Plan : in 1949, £1,814,739 ; in 1951, £1,814,739 ; in 1952, £1,162,662 ; in 1953, £184,052 ; in 1954, £1,060,230 ; and in 1955, £898,545. Separate State figures are not available for distributions made in subsequent years. (*d*) Net value of production is derived by deducting from the gross value all marketing costs and the cost of certain goods (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.) used in the processes of production. (*e*) Not available.

(*a*) For the purpose of these statistics the term "Factories" comprises industrial establishments in which four or more hands were employed or motive power was used in the processes of manufacturing, assembling, treating or repairing. (*b*) For 1924 and earlier, calendar year; from 1927, year ended 30th June. See also note (*l*). (*c*) Average over the full twelve months and includes working proprietors and, up to and including 1925–26, fallers and haulers employed by sawmills. (*d*) Figures for 1929–30 and later years exclude amounts drawn by working proprietors. (*e*) Selling value "At Factory Door". (*f*) Value added in course of manufacture, representing sum available for payment of wages, rent, interest, depreciation, advertising, insurance, etc., and profit. (*g*) Comprises standard bricks of all types. Prior to 1925–26 firebricks and blocks were included. (*h*) Includes plywood veneers in terms of super. feet and hewn timber produced by agencies other than "Factories". (*i*) For 1917 and earlier years, includes butter made on farms. (*j*) Short ton = 2,000 lb. (*k*) Not available. (*l*) Eighteen months ended 30th June. (*m*) Not available for publication. * Revised.

(a) For current statistical purposes the Consumer Price Index supersedes the "C" Series Retail Price Index formerly given in this publication. The index numbers shown are so designed as to measure periodically the movement in retail prices of the specified groups of items in each city individually. They do not provide a measure of differences in absolute price level as between cities, nor of comparative costs of the groups of items. (b) Year ended June. (c) Weighted average.
